Latvia won its first-ever in Ice-Hockey World Championship bronze in 2023, in a thrilling match with USA 4:3

Also we are top 3 (bronze) in egg production per capita

And surely the largest egg producer in Baltics with export to 20+ countries

And what about

Balticovo

Balticovo is one of Northern Europe’s leading egg producers, redefining everyday products through innovation, sustainability, and internationally recognized design.

In Numbers

1 billion

We reached 1 billion eggs in 2025

5 million

We have 5 million beautiful hens working every single day

7 varieties

We have 7 different egg pasta varieties so you could have 7 different meals per week

Three facts about us...

01

Full-Cycle Production

We operate a fully integrated production system — from feed production to finished products. This allows full control over quality, traceability, and efficiency, while enabling innovation across a wide product portfolio including eggs, egg products, and egg-based foods.

02

Biogas & Circular Economy

Balticovo uses poultry manure and production by-products to produce biogas — turning agricultural waste into renewable energy.

03

From cages to freedom

We are on a clear path to becoming fully cage-free by 2029, transitioning to barn and free-range egg production in our own farms and in partnership with local farmers.

Who still remembers ice - egg - cream...?

Now we have gone even further...

Let’s talk pasta

WHY PASTA?

With more than 50 years of expertise in the egg industry, Balticovo continues to highlight the unique value of eggs as a raw material and their versatile applications. Balticovo egg pasta, now well-established on the market, represents our commitment to offering high-quality products rooted in the natural benefits of eggs.
